

Luxury hidden disabled access for Hotels and Hospitality

Helping to make all your guests comfortable
Very discreet wheelchair access

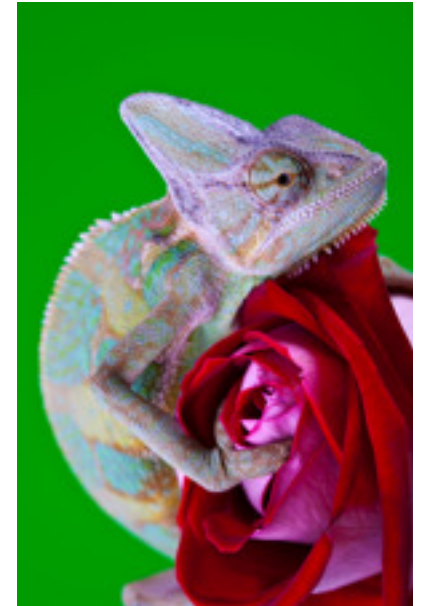

The Chameleon Boutique Step Lift Range

These Invisible Step Lifts are ideal for where a very discreet low-rise solution for disabled access over steps is required, whilst at the same time maintaining existing steps without the need for providing a permanent or temporary ramp. When not in use these lifts are concealed by automatically retracting under the lower level surface becoming virtually invisible.

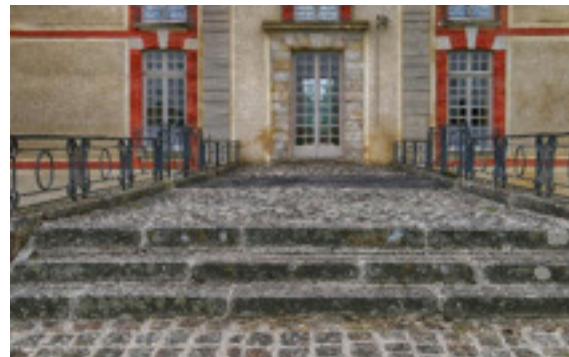

The top surface of these lifts can be covered / faced with a variety of materials such as: marble, carpet, slate, timber, laminate, tiles, stone or brick in order for them to blend into their surroundings. Whether installed either inside a building or externally outside you can have an elegant solution for fulfilling your obligations for providing disabled access.

The Chameleon Boutique Step Lift Range

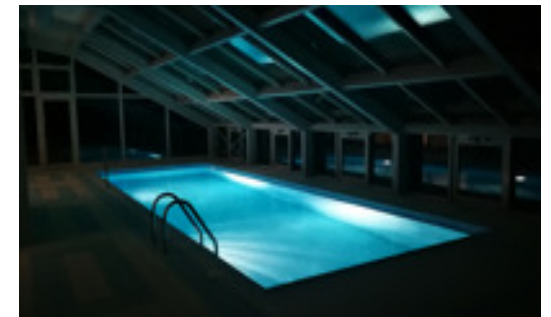

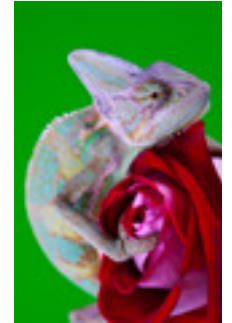

Chameleon Boutique Step Lifts can also be installed externally outside thereby offering discreet wheelchair access over steps to building entrances or to outdoor locations such as car parking areas, hotel grounds, gardens, terraces, patios, outdoor dining areas or access to other buildings that might be located within hotel grounds including saunas, beauty treatment rooms, spas, sports facilities and dedicated conference venues for corporate events.

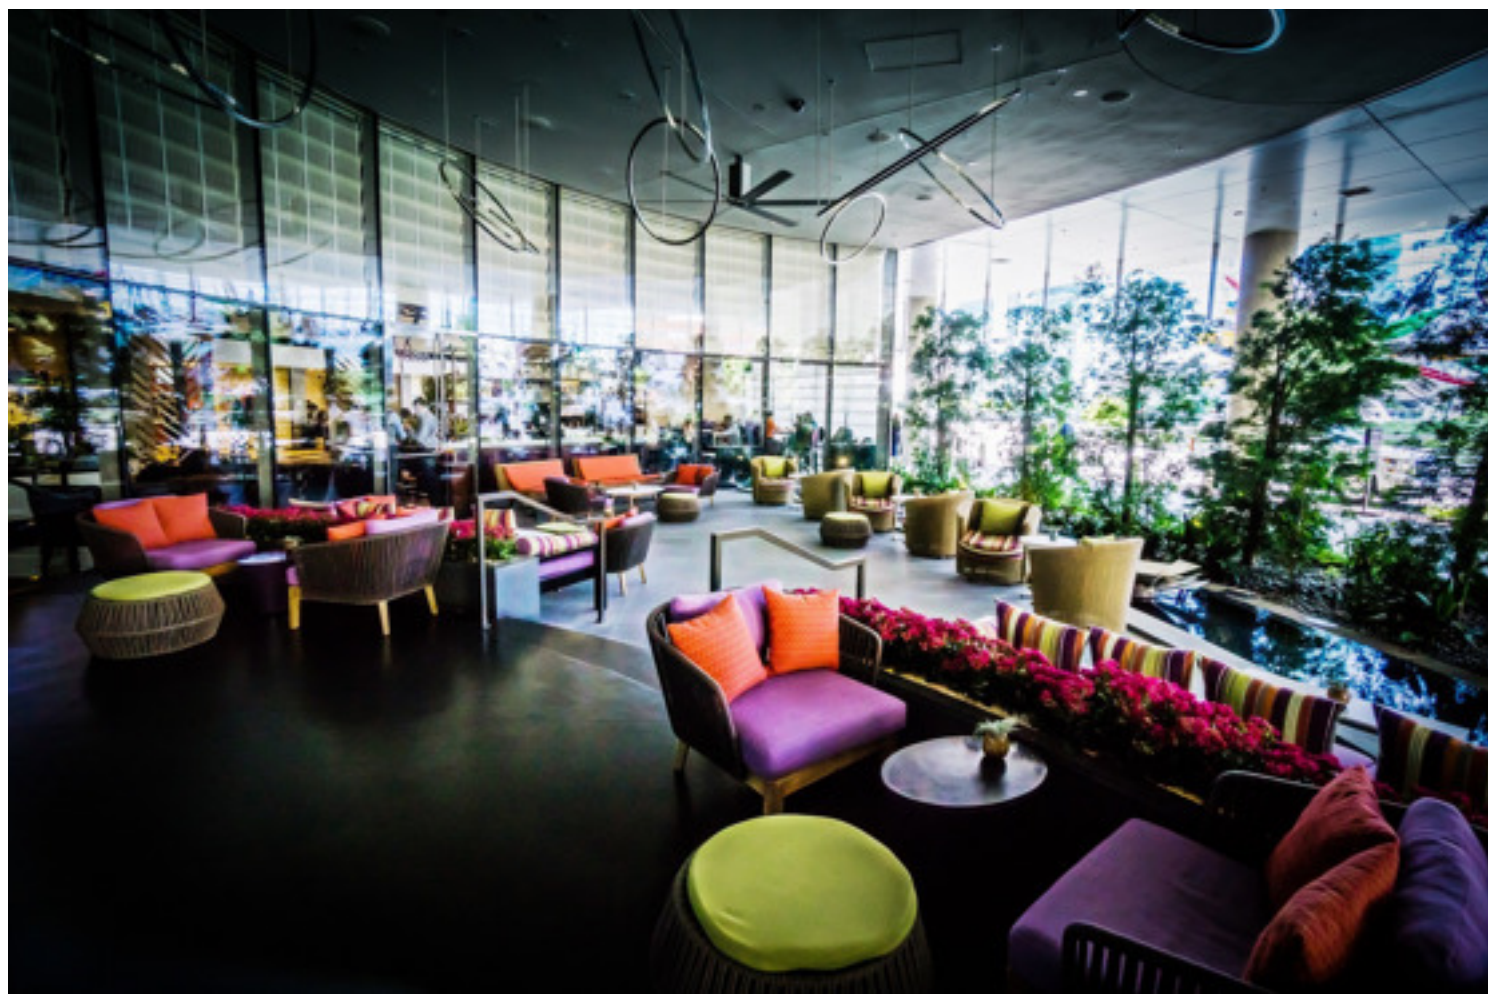

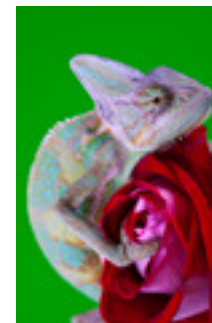

The Chameleon Boutique Step Lift Range

Specific different areas within a building that might benefit from improved disabled access for guests may include corridors and upstairs landings that have a step or several steps, passage ways leading out to a swimming pool area or a side entrance /exit to a car park. All Chameleon Invisible Step Lifts can accommodate a wide choice of finishes - such as tiles, as illustrated below, meaning that in addition to blending in with their surroundings the top surface can also be very hardwearing.

The Chameleon Boutique Step Lift Range

Hotels, restaurants, bars, retail businesses, heritage or public buildings and visitor attractions with split level rooms or internal entrance lobbies with steps may find the Chameleon Invisible Step Lift is the perfect solution for providing unobtrusive access for wheelchair users for when it is required, whilst remaining virtually invisible when not in use.

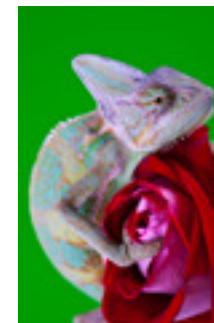

The Chameleon Boutique Step Lift Range

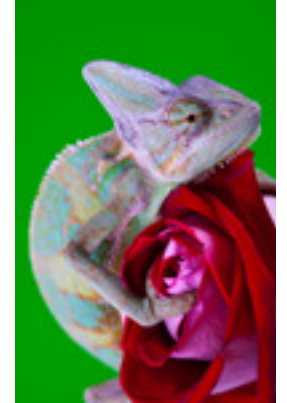

There are three different models of Chameleon Boutique Step Lifts with different travel capabilities:

Multi Step to traverse a series of steps, as shown in previous photos in this brochure.

Vertical Riser to access a raised floor area that has no steps such as a stage or raised dining area in a bar.

Single Step to provide wheelchair access over a single step (e.g. one step in a corridor)..
